

ACANA

stubbornly good.

WHO WE ARE WELCOME TO ACANA™

ACANA™ goes above and beyond in crafting our dog & cat food, including sourcing high quality animal proteins like fresh or raw* poultry, meats and wild-caught fish. Our recipes are also balanced with fresh vegetables, fruits and botanicals to help your pet live a full and healthy life.

Ingredient example from ACANA™ Dog Red Meat. Animal protein sources depicted in fresh form before processing. Proportions and quantities not representative of contents of one package or serving. Cuts may vary. See ingredient list.

* Our included fresh ingredients use refrigeration as the sole method of preservation. Our included raw ingredients are frozen at the peak of freshness to preserve nutrients.

WHAT IS ACANA™?

QUALITY INGREDIENTS FOR DOGS & CATS:

We're dedicated to making quality ACANA™ pet food from start to finish with the best ingredients.

Our foods are crafted with fresh or raw* quality animal ingredients balanced with whole fresh fruit and vegetables to help support your pet's full and healthy life as a happy member of your family.

We're transparent about our ingredients with ACANA™ petfood, and are proud of the fact that we source only quality ingredients from our trusted suppliers, in recipes we control from start to finish. By providing high inclusions of animal protein balanced with fresh fruits, vegetables and botanicals, our ACANA™ dog & cat food is as nourishing as it is satisfying.

NO ARTIFICIAL COLOURS, FLAVOURS OR PRESERVATIVES ADDED IN OUR KITCHEN

* Our included fresh ingredients use refrigeration as the sole method of preservation. Our included raw ingredients are frozen at the peak of freshness to preserve nutrients.

WHAT IS ACANA™?

EVERY ACANA™ RECIPE INCLUDES:

- At least **50%*** **quality animal ingredients**
- Recipes balanced **with fresh vegetables, fruit, botanicals & nutrients**
- **Added vitamins and minerals**, natural preservatives and probiotics
- A delicious variety of recipes and a range of options **to suit every dog & cat**

OUR RECIPES NEVER INCLUDE:

- **No** artificial flavours, colours, or preservatives added in our kitchens.
- **No soy, corn, tapioca** or wheat ingredients added in our kitchens.

FARM-FRESH FRUIT & VEGETABLES

MADE WITH FRESH OR RAW INGREDIENTS

FRESH: Our included fresh ingredients use refrigeration as the sole method of preservation.

RAW: Our included raw ingredients are frozen at the peak of freshness to preserve nutrients.

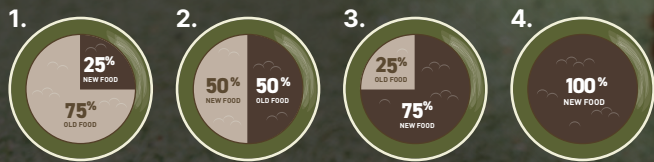

* Approximate and derived from the unprocessed state of the ingredients.

ACANA™ TRANSITIONING

TRANSITIONAL FEEDING

Dogs and cats are often fed the same food for a long period of time, which means a sudden food change makes it difficult for their digestive systems to adapt.

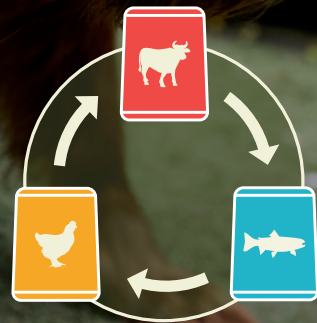

That's why it's important to introduce new food gradually. Going slowly will give your pet time to adjust to their new food and will also reduce the chances of digestive upset. Start by mixing 25% new food with 75% old food. Slowly increase the new food proportionately over the next 5-7 days until you are feeding 100% new food.

ROTATIONAL DIET

Keep things exciting at mealtime by rotating the ACANA™ recipes you feed your pet. This will

allow your best friend to enjoy a variety of animal proteins in delicious and nourishing new flavours. Don't transition too abruptly, start by replacing 25% of the old food with the new recipe and gradually increase the amount over time. Puppies and kittens are recommended to remain on puppy and kitten diet.

ACANA

stubbornly good.

HELPFUL INFORMATION	Higher in protein, fat and calories, an ideal option for growing kittens.	Featuring a blend of poultry ingredients, a great diet to introduce cats to ACANA™.	Higher in Omega-3 & 6; beneficial for skin and coat health.	Lower in fat and calories, an ideal option for less active indoor cats and sterilized cats.	This specially formulated recipe helps support 3 key health benefits to nurture your kitten's development.	This recipe is specifically formulated to support the unique nutritional needs of indoor cats.	Great addition to a rotational diet, and a unique option for picky eaters.	A good introductory diet for cats transitioning to ACANA™. Easily digestible proteins.	With a higher Omega content, this recipe, from fish ingredients, is great for skin and coat health.
